ROBUST CONSTRUCTION

- The Colex Sharpcut's advanced engineered flatbed cutting table, manufactured in Elmwood Park, NJ is designed for cutting sheet and rigid materials while delivering clean, smooth edge quality.
- All movements (X,Y,Z,W) are powered by top of the line Panasonic Servo Motors.
- The gantry is made out of Aerospace aluminum alloy, strong enough to accommodate the optional 3HP Router.
- Rack and pinon drive for reliability, long life, and cost efficient maintenance.

TRIPLE INTERCHANGEABLE TOOL HEAD

- Fixed router with two interchangeable tool positions for various knives and creasing wheels.
- Computer selects proper tool for each job.
- Optional add-on tools for cutting and creasing are available to customize workflow.
- The new router debris collector has incorporated a spring loaded hold-down foot that inhibits media shifting while routing (especially helpful when routing small pieces).

VISION REGISTRATION

The Sharpcut, powered by Optiscout, can read any diameter registration mark, crop mark or square resulting in highly efficient production.

- Optiscout Import Filters & File Import Filters
- Material Library
- Edge Recognition
- Overcut Compensation
- CCD Registration Camera

VACUUM SYSTEM

- 6 Independent Vacuum Zones
- Energy Efficient/Low Power Consumption
- Industrial Vacuum Motors for Durability

COMPATIBLE SOFTWARE (OPTIONAL)

- CAD & Graphic Systems Compatible
- 3D Software
- 2D Software
- Packaging Design Software
- And More

COMPUTER, STAND & WINDOWS SOFTWARE INCLUDED

TRIPLE INTERCHANGEABLE TOOL HEAD

- 3HP Router upgrade option
- For Rigid Media Workflow
- Laser Pointer Standard
- Camera Registration Standard

CONVEYOR ROLL FEEDER INCLUDED

For manual and automatic feeding of flexible rolls.

Optional manual roll feeder for non-conveyor models.

AUTOMATIC BOARD FEEDER

The automatic board feeder is designed to load semi rigid to rigid boards from the pallet table onto the conveyor belt. It is designed to work with a large array of material sizes and thicknesses.

Available on Conveyor Models Only

PALLET TABLE

When used with the Automatic Board Feeder the pallet table will automatically maintain the material height. The pallet table drops down to 6" in height for easy loading and unloading.

Available on Conveyor Models Only

CLAMPING BAR

The clamping bar insures that the material advances at the same rate as the belt as it advances down the table. The clamping bar is to be used in conjunction with either the Roll Feeder or the Automatic Board Feeder to insure consistent material placement before cutting.

Included in Conveyor Model Only
